

REPLACING YOUR DIE ON YOUR SELF INKING DEVICE

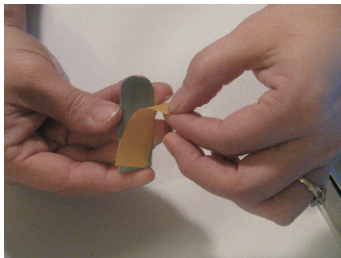

Placing your stamp in your hands upside down place your thumbs on each side of the bottom and press down about 1/8".

Holding the stamp down 1/8" with one hand use your other hand to press the two buttons in on each side of the stamp device. Buttons should click into place and lock device.

Peel the existing die off the device plate surface. Rubber die should remove easily. Discard die.

Peel the backing off your new stamp rubber die.

Reattach the new die to the device plate. Die can be readjusted to straighten the position.

Using your thumbs depress the stamp sides again releasing the locked side buttons.
